SUMMARY

- Results-driven **Software Engineer (Full Stack)** with 4+ years of experience in designing, developing, and deploying enterprise-scale web applications on cloud platforms. Proficient in **Python, JavaScript/TypeScript, and SQL**, with expertise across the **React–Node.js–MongoDB** ecosystem. Experienced in **Agile development, microservices architecture, automation, and DevOps (Docker, AWS/Azure)** practices. Strong foundation in **data structures, algorithms, and software design principles**. Passionate about **AI-driven automation**, performance optimization, and delivering scalable solutions aligned with business goals.

SKILLS

- Programming:** Python, JavaScript, TypeScript, Java, C++
- Front-End Technologies:** React, Next.js, Redux, React Query, HTML, CSS, TailwindCSS, Bootstrap
- Back-End Technologies:** Node.js, Java, JSP, SQL, REST APIs, JWT
- Frameworks & Libraries:** Express, Next.js, Redux, React Query, Mongoose
- Databases:** MongoDB, MySQL, PostgreSQL, Oracle
- DevOps & Cloud:** Docker, GitHub Actions, AWS, Azure (familiar), CI/CD, Terraform
- Tools & Platforms:** Git, GitHub, SOAP UI, Postman, Swagger, Supabase
- Soft Skills:** Agile Development, Problem Solving, Communication, Collaboration

EXPERIENCE

Software Engineer | H&M Services Private Limited, Bangalore

(Dec 2025 – Present)

- Designed and developed an **internal broadcasting platform** enabling stakeholders to publish and manage clothing content across multiple business domains, improving content delivery efficiency by **~40%**.
- Refactored and **optimized API integration** with a global common clothing data service, reducing API response latency by **~35%** and improving data throughput under high concurrency.
- Translated Jira user stories into scalable technical solutions, delivering features within **Agile sprint** cycles with minimal regression defects.

Full Stack Developer | Firstsource Solution Limited, Bangalore

(Jan 2025 – Dec 2025)

- Developed **Agentic AI Solution**, a portal leveraging **AI/LLMs** to dynamically generate UI components from Excel configuration files.
- Implemented a **low-code/no-code UI generation system**, reducing manual UI development time by **60%**.
- Enhanced authentication and authorization via **Keycloak (OAuth2, JWT, SSO)**, ensuring secure multi-tenant access control.
- Built and maintained **backend microservices** using **Node.js, Express, and MongoDB**, optimizing scalability and performance.
- Deployed components on **Azure**, incorporating **CI/CD pipelines** for automated testing and deployment.

System Engineer | Tata Consultancy Services, Bangalore

(Dec 2021 – Jan 2025)

- Designed and implemented **enterprise-scale modules** as part of Agile teams, improving system stability and scalability.
- Revamped responsive UI using **React, TypeScript, and TailwindCSS**, achieving **95% mobile-friendliness** and boosting engagement.
- Built RESTful APIs using **Node.js and Express**, and optimized **SQL** queries for faster performance (30% reduction in retrieval time).
- Conducted automated unit testing with **Jest**, achieving **90% code coverage** and reducing production bugs by **25%**.
- Participated in **sprint planning, code reviews, and DevOps workflows**, ensuring high-quality releases.
- Migrated legacy components to **microservice architecture**, improving maintainability and reducing technical debt by 20%.

CERTIFICATIONS

- | | |
|---|-------------|
| IBM Full Stack Software Developer Professional Certificate (Coursera) | March, 2021 |
| The Complete 2023 Web Development Bootcamp (Udemy) | Jan, 2021 |
| MERN Stack Front To Back: Full Stack React, Redux & Node.js (Udemy) | Feb, 2022 |

EDUCATION

Bachelor of Technology in Computer Science and Engineering | **BVEC, Nirala, Karimganj**

(2017 - 2021)

- Percentage:** 78%
- Relevant Coursework:** Data Structures and Algorithms, Web Technologies, Database Management Systems, Object-Oriented Programming, Software Engineering
